

Answering a 5 mark question

- * 5 minutes to answer the question
- * Take 3 points (or 2 if the question specifies) from source and explain the points from own understanding
- * Don't quote the source, paraphrase in your own words.
- * Suggested structure
 - * The first point from the source is... ' then explain the point
 - * The second point from the source is... ' then explain the point
 - * The third point in the source is... ' then explain the point

Answering a 10 mark question

- * Source and own knowledge
- * 2 points from source and 2 points from own knowledge unless the question specifies 3
- * Suggested structure (bit clunky!):
 - * Para1: From the source I can take...
 - * Para 2: From the source I can also take...
 - * Para 3: From my own knowledge I also know...
 - * Para 4: Finally from my own understanding I also know...
- * 25 mark question identical to unit 1 - no need for source quotations.

Answering a 40 mark question

- * Consider doing this FIRST as you need to spend 40 minutes on this!
- * MAKE a PLAN - even if that is for 5 minutes
- * Build a structure - need 7-8 points (3-4 on either side) - although this is not rigid and maybe fewer.
- * Must have an introduction - show appreciation of topic and if you want how you propose to answer it
- * Pay attention to key words
- * There may be more than 2 sides to the debate
- * Remember P E E L
- * REMEMBER paragraphing
- * Always focus each para on title
- * Remember start by displaying your knowledge and then analyse
- * Have a conclusion where you answer the question
